PROJECTS

1. BigBasket | 🌐 | 🐙
JavaScript | HTML | CSS

- Replicated the renowned online grocery platform, BigBasket, in a responsive web application.
- Implemented multiple payment options, user authentication, and navigation links for an enhanced user experience.
- Integrated address information and ensured secure payment gateways.
- Independently developed within a tight deadline of 5 days.

2. Electron | 🌐 | 🐙
HTML | JavaScript | Advanced JavaScript | CSS

- Developed an electron-themed e-commerce web application, focusing on responsiveness and user-friendly design.
- Implemented multiple payment options, an efficient cart page, and user-friendly address information capture.
- Integrated a secure payment gateway using Razorpay and included a shopping cart summary for a seamless checkout experience.
- Provided detailed website information, including contact details and location details.

3. Spotify | 🌐 | 🐙
React.js | Redux | HTML | CSS

- Developed a Spotify clone with a focus on user authentication, enabling personalized profiles and playlists.
- Implemented notifications, music catalog, and audio quality settings for an enriched user experience.
- Ensured responsiveness and intuitive navigation through playlists, libraries, and liked songs.
- Leveraged recommendation algorithms to enhance user engagement.
